

# **Psychological Evaluation Pre-Work Activity**

*Directions:* Psychological evaluations are an important source of information, not only for Mental Health Professionals but for Child Welfare Professionals as well. During **308 Adult Mental Health Issues: An Introduction for Child Welfare Professionals**, we will be spending time exploring how the information found in a psychological evaluation can inform Child Welfare decision making.

In order to prepare for this learning experience, we are asking that *ALL* participants review a psychological evaluation prior to attending the training. This psychological evaluation can be from an existing case on your caseload or from one of your co-workers. As you review the evaluation, please indicate what type of information found within the evaluation itself using the checklist bellow. **Please remember to bring this pre-work activity with you to the training!**

Type of Information	Was the Information Found in the Psychological Evaluation?	
	Yes	No
Reason for the Evaluation:
