

## **Infant Hair-care Tips**

- Infants require special, but simple, hair care. A baby's hair should typically not be washed more than once a week.**
- A baby's hair and scalp can be cleaned with a washcloth and a natural, mild baby shampoo.**
- It should then be rinsed with luke-warm water.**
- Apply small amount of light and natural oil to the hair and scalp.**
- Brush the hair with a soft-bristle baby brush in the direction that it naturally grows.**
