## The Authors

**Nan Giblin Beeler** received her master's degree in social work from Ohio State University. She has extensive work experience in the public and private child welfare systems. Prior to joining the staff of the Institute for Human Services in 1986, she was a caseworker for abused, neglected, and unruly adolescents and their families in a county child welfare agency, and she served as director of a day treatment program for emotionally disturbed and developmentally delayed preschool children. Ms. Beeler is a Training Coordinator for the Ohio Child Welfare Training Program and has conducted Core training for the program. Ms. Beeler provides consultation and technical assistance in competency-based in-service training, conducts program evaluations of child welfare agencies, and has developed competencies and training curricula in topics related to sexual abuse, foster parenting and independent living.

**Judith S. Rycus** received her doctorate in developmental psychology from Ohio State University and her masters in social work from Wayne State University. She has been the Program Director of the Institute for Human Services in Columbus, Ohio, since its inception in 1977. She has been employed in direct service, management, and training positions in the child welfare field since 1968. Dr. Rycus has developed and conducted extensive in-service training programs for child welfare staff, and she currently manages program development and training activities of the Ohio Child Welfare Training Program. She conducts program evaluations of child welfare agencies and provides consultation services. Dr. Rycus is the principle author of the Individual Training Needs Assessment Instrument and the 14-day Core Curriculum for Child Welfare Caseworkers. She co-authored Target - Competent Staff: Competency-Based Inservice Training for Child Welfare, and Child Welfare Services for Children With Developmental Disabilities. She also co-developed Train Track™ Training Management Software.

**Ronald C. Hughes** received his doctorate in developmental psychology from Ohio State University and his master of science degree in social administration from Case Western Reserve University. Dr. Hughes has been the Director of the Institute for Human Services since 1977. He has worked extensively in the fields of child welfare and developmental disabilities and has authored publications important to both fields, including Target - Competent Staff: Competency - Based Inservice Training for Child Welfare, and Child Welfare Services for Children with Developmental Disabilities. Dr. Hughes is a principal developer of the Comprehensive, Competency-Based In-service Training Model. He directs statewide coordination of the Ohio Child Welfare Training Program and manages activities of the Central Ohio Training Consortium for Developmental Disabilities. He also conducts program evaluations and provides consultation in program development for agencies in the child welfare, developmental disabilities, and mental health fields.

**Rhonda J. Lilley** received her doctorate in developmental psychology from the Ohio State University. She has extensive clinical experience with abused, neglected mentally retarded and developmentally disabled children. She has been employed with the Institute for Human Services since 1985 as Director of the Central Ohio Training Consortium, a regional inservice training program for staff who work with adults and children with mental retardation and developmental disabilities. Dr. Lilley is the principal developer of the Core Curriculum for Community Based Residential Providers. She is a Core trainer with the Ohio Child Welfare Training Program, and has developed and presented numerous workshops in child development, psychological assessment, parenting skills, behavior management of children, and the screening and assessment of developmental disabilities.

**Sandra L. Priestino** received her doctorate in psychology from the University of South Carolina, and her master's degree in vocational rehabilitation counseling from Florida State University. She has extensive experience in administration, training, and direct services in the fields of juvenile justice, youth services, and child welfare. She has been a Core trainer for the Ohio Child Welfare Training Program since 1987. Dr. Priestino and her husband have six children, three of whom are adopted. They also have considerable experience caring for youth as foster parents.

**Susan H. Turben** received her doctorate and masters degrees in special education and early childhood education from Kent State University. Dr. Turben works in a private practice and provides home based educational and developmental services to families. She also conducts inservice training in topics related to child care and child development, and has taught Early Childhood Education at the Community College level. She was previously employed as supervisor and coordinator of infant and preschool services, and as a staff development specialist, for the New York State Department of Mental Hygiene. Dr. Turben is a Core trainer with the Ohio Child Welfare Training Program.

**The Institute for Human Services** is a private, nonprofit multi-service social agency in Columbus, Ohio. The Institute developed the Comprehensive, Competency-Based In-service Training Model for child welfare, and currently, in partnership with the Child Welfare League of America, is coordinating the development and implementation of the training system in several states. The Institute provides training, technical assistance, program consultation, and evaluation services to agencies in the fields of child welfare, developmental disabilities, and mental health. The Institute is State Coordinator of the Ohio Child Welfare Training Program of the Ohio Department of Human Services, the first Comprehensive, Competency-Based Training System.
